Contents

1. Abstract

DIAMOND (DMD) is the prestige token of ZARUverse, designed to unlock elite access, mythic governance, and premium NFT relics. It represents the crown layer of the ecosystem—scarce, symbolic, and technically sound.

DMD runs on BNB Smart Chain (BEP-20) to enable fast settlement, low fees, and broad wallet support. This document outlines DMD's vision, mechanics, utilities, distribution, risk posture, and compliance considerations.

2. Overview

Token name:
DIAMOND
Ticker:
DMD
Network:
BNB Smart Chain (BEP-20)
Contract:
0x8c4c0116d051f6f2ea27e8fa7614c8f799191ab3
Decimals:
18
Total supply:
100,000,000,000,000

DMD anchors the prestige layer of ZARUverse. It powers mythic governance, unlocks premium NFT relics, and signals elite participation across products and lore. It complements MAK1 and ZARU within a tri-token architecture.

> Design principle: scarcity, symbolism, and sovereign access.

3. Architecture

DMD is a BEP-20 token with ERC-20 compatibility. The core contract is verified and immutable post-audit. Integrations include staking modules, NFT minting gates, and governance flows with on-chain execution.

- **Contract standard:** BEP-20 (ERC-20 compatible)
- **Wallet support:** MetaMask, Trust Wallet, Ledger
- **Explorer:** BscScan for transparency and verification
- **Front-ends:** Token page, swap links, staking and governance dashboards

4. Tokenomics

DMD's supply is fixed at genesis and allocated to reinforce prestige, incentivize governance, and reward long-term contributors.

Bucket	Allocation	Vesting	Notes
Elite Staking Rewards	30%	Linear 24 months	Mythic governance incentives
NFT Relic Access	20%	Unlocked	Premium minting and lore drops
Treasury & DAO	20%	Linear 36 months	Governance, grants, protocol upgrades
Team & Architects	15%	6m cliff + 24m linear	Core contributors
Strategic Partners	10%	3m cliff + 12m linear	Exchanges, infra, branding
Reserves	5%	Unlocked	Contingency and ops

Allocations are indicative and may be refined before final listings. Any change will be on-chain and publicly announced.

5. Distribution

- **Genesis:** Initial liquidity on PancakeSwap; contract verified on BscScan.
- **Staking:** Mythic staking pools with tiered rewards and governance weight.
- **NFT access:** DMD unlocks premium relics and lore-bound drops.
- **Vesting:** Multi-sig controlled timelocks for team and partners; public vesting dashboards.

6. Utilities

Prestige access

- Unlock mythic NFT relics and exclusive drops
- Access premium staking dashboards and features
- Participate in elite governance rounds

Symbolic utility

- Signal elite status across ZARUverse products
- Enable lore-bound quests and DAO rituals
- Serve as collateral in future DeFi integrations (subject to risk)

7. Governance

DMD holders shape the mythic layer of ZARUverse governance. Voting power is weighted by staked DMD and credible participation.

- **Phase I:** Council-led proposals with community feedback
- **Phase II:** Snapshot-style voting with quorum thresholds
- **Phase III:** On-chain execution via timelock, DAO treasury, and multi-sig

> Governance is designed to be symbolic, sovereign, and scalable.

8. Security and audits

- **Audits:** Audit Report #2 (DMD core contract). Related reports: #1, #3
- **Contract status:** Verified and immutable on BscScan
- **Operational security:** Multi-sig treasury, limited admin roles, defense-in-depth
- **Bug bounty:** Community-driven disclosures with tiered rewards

9. Roadmap

Phase	Milestones	Status
Q4 2025 — Launch	Token page, liquidity, audit publication	Live
Q1 2026 — Staking	Mythic staking pools, lore-bound quests	Planned
Q2 2026 — Governance	Snapshot voting, DAO treasury setup	Planned
Q3 2026 — Expansion	Cross-chain bridges (if warranted), relic minting engine	Planned

Roadmap is indicative and may adapt to market conditions and community priorities.

10. Compliance and risk

- **Jurisdictional awareness:** Users must comply with their local laws and restrictions.
- **No investment advice:** This document is informational only and not a

solicitation.

- **Volatility risk:** Crypto assets involve market, technical, and regulatory risks.
- **Transparency:** Contract verification, public audits, and multi-sig controls reduce information asymmetry.

> By interacting with DMD, participants acknowledge the risks of blockchain networks and smart contracts.
